Professional Summary

Full-Stack Developer with 4+ years of professional software development experience building ASP.NET Core and React-based business applications. Strong backend background with hands-on experience in ERP systems, workflow-driven solutions, client-facing delivery, legacy modernization, bilingual applications, and end-to-end feature development.

Technical Skills

Backend: C#, ASP.NET Core Web API, REST APIs, Minimal APIs, MVC, Entity Framework Core, Dapper, LINQ, SignalR, Hangfire, FluentValidation, AutoMapper

Frontend: React.js, Vite, Next.js, TypeScript, JavaScript, Redux Toolkit (RTK), React Query (TanStack Query), Bootstrap, Sass, Tailwind CSS, Material UI, Ant Design, HTML5, CSS3

Database: SQL Server, MongoDB

Messaging & Caching: RabbitMQ, Redis

Architecture & Practices: ABP Framework, Clean Architecture, CQRS with MediatR, Vertical Slice Architecture, SOLID Principles, Agile Methodologies & Scrum

Tools: Git, GitHub, GitHub Actions (CI/CD, Continuous Integration), Azure DevOps

Familiar With: Docker, Angular

Professional Experience

• HUED Company

Full-Stack Developer (ASP.NET Core & React) | May 2025 – Present

- Develop end-to-end full-stack applications across 3 client projects in a software-house environment using ASP.NET Core, React/Next.js, Entity Framework Core, and SQL Server.
- Implement multi-stage workflows with validations, status transitions, and business rules to manage user processes and business operations across different stages, while supporting bilingual Arabic/English applications with RTL/LTR layouts.
- Develop reporting features, business dashboards, and PDF/Excel exports, while integrating SignalR notifications and implementing Hangfire background jobs for automated processing.

• Halan Company

.NET Developer (ASP.NET Core) | October 2024 – May 2025

- Developed and enhanced ERP modules and RESTful APIs for Talabeyah's B2B platform using ASP.NET Core, Entity Framework Core, and SQL Server, supporting thousands of users and handling millions of database records across order management, inventory, products, and merchant workflows.
- Implemented backend workflows and business rules across Inventory, Order Management, and Trips modules.
- Developed product-return logic to calculate return eligibility and quantity limits based on product classification, pricing, and value thresholds.
- Contributed to frontend development tasks using Angular and React to deliver end-to-end application features.

- **Oasis Computer Systems Company**

- .NET Developer (ASP.NET Core)** | April 2022 – October 2024

- Modernized a legacy Insurance Broker System by migrating backend functionality from VB.NET to ASP.NET Core Web API.
 - Optimized the data-access layer using Dapper and SQL Server while preserving existing business rules and system behavior.
 - Collaborated directly with clients to gather requirements, customize workflows, and deliver client-specific enhancements.
 - Supported around 7 clients across Saudi Arabia, the UAE, and Oman through IIS/Windows Server deployments, data migration activities, UAT support, user training, troubleshooting, customization, and post-go-live support.

Featured Projects

Sanad Sales – Mini ERP System | Personal Project

ASP.NET Core MVC / Web API, Entity Framework Core, SQL Server, React

- Developed a mini-ERP system covering sales, purchasing, inventory, suppliers, customers, employees, payroll, financial operations, banking, and user management.
- Migrated the backend architecture from MVC to ASP.NET Core Web API and rebuilt the frontend using React.

Live Demo: sanadsales.net

GitHub: github.com/AhmedIbrahim-tech/Sanad-Sales

E-Commerce Platform | Personal Project

ASP.NET Core API, Clean Architecture, CQRS, MediatR, EF Core, SQL Server

- Developed a multi-role e-commerce backend covering catalog management, cart, order management, payments, promotions, merchants, and user management.
- Integrated Paymob payments, Hangfire background jobs, and SignalR notifications.
